👤 Portfolio

PROFESSIONAL SUMMARY

Full-stack Engineer with 3+ years of experience specializing in **Next.js (App Router)** and **TypeScript**. Expert in building scalable, type-safe UIs and managing complex state via Zustand and Redux Toolkit (RTK Query). Proven track record in converting Figma designs into pixel-perfect interfaces while optimizing for multi-tier caching and sub-second performance. Highly proficient in **Docker, Linux environments**, and integrating frontend systems with **microservices architectures** and real-time WebSockets.

TECHNICAL PROFICIENCY

CORE TECH

React, Next.js, TypeScript, Node.js, MongoDB, Redis, WebSockets (Socket.io)

ARCHITECTURE/SECURITY

RBAC, Logic-Driven UI, Atomic Design, REST APIs

STATE MANAGEMENT

Context API, useReducer, Custom Hooks, Zustand

TESTING/DESIGN

Jest, React Testing Library, Framer Motion, Figma

OPTIMIZATION

Redis Caching, CDN Integration, SEO, SSR/SSG, Multi-tier Caching, Server-Sent Events

TOOLS

Linux, Git, Docker, CI/CD

PROFESSIONAL EXPERIENCE

Software Developer

2024 – Present

RaadCraft Solutions Next.js TypeScript

- Architected enterprise systems using Next.js/TypeScript, ensuring 100% type-safety.
- Optimized **Context Providers** to eliminate unnecessary re-renders in high-data modules.
- Developed reusable **Atomic Design Systems**, accelerating team velocity by 40%.
- Streamlined development-to-production workflows using Docker containerization and Linux-based CI/CD pipelines.

Full-stack Developer

2023 – 2024

RevEnComm MERN Stack Zustand

- Delivered pixel-perfect SaaS interfaces from **Figma mockups** for high-traffic products.
- Engineered **Logic-Driven UI components** to secure **RBAC** (Role-Based Access Control) modules.
- Managed asynchronous data flows, reducing API latency and improving dashboard responsiveness.

IMPACT-DRIVEN PROJECTS

Coworker AI — Full AI Hub Architecture [\[View Project\]](#)

Async State Mgmt

- Built managed state flows for **AI media synthesis**, improving usability and reliability.
- Implemented a **React Tour onboarding system**, measurably increasing user success rates.

Cartelier — E-commerce Ecosystem [\[View Project\]](#)

Redis / RBAC / CDN

- Built a production-ready platform with complex **RBAC workflows** for multi-tenant journeys.
- Optimized inventory synchronization using **Redis caching** and **CDN** for global asset delivery.
- Integrated **Stripe** for secure, real-time checkout and payment processing.

ACADEMIC FOUNDATION

B.Sc. in Information and Communication Engineering | NSTU (2023)

TIMEZONE AVAILABILITY

Open to Global Timezones (GMT+6 Base)

ENGAGEMENT MODEL

Full-time | Remote | Hybrid | Relocation

COMPENSATION

Market-aligned / Negotiable
